Document Summary

This document has 2 parts. Part I consists of performance information for plan investment options. This part shows you how well the investments have performed in the past. Part II shows you the fees and expenses you will pay if you invest in an option.

Part I. Performance Information

Table 1 focuses on the performance of investment options that do not have a fixed or stated rate of return. Table 1 shows how these options have performed over time and allows you to compare them with an appropriate benchmark for the same time periods. Past performance does not guarantee how the investment option will perform in the future. Your investment in these options could lose money. Information about an option's principal risks is available on the Web site[s].

All funds assume reinvestment of all dividends (ordinary income and capital gains) and are net of management fees and other fund operating expenses as well as separate account charges where applicable. The numbers may also reflect maintenance fees, administration fees, and/or deferred sales charges, if your contract is funded through a registered separate account. The table shows how these options have performed over time and allows you to compare them with an appropriate benchmark for the same time periods. Note that the benchmark performance does not reflect the fees and charges associated with the product and investment options in your particular contract.

Table 3 shows fee and expense information for the investment options listed in Table 1 and Table 2. Table 3 shows the Total Gross and Net Annual Operating Expenses of the options in Table 1. Net Operating Expenses are reduced by fund waivers and adjustments, when applicable. Annual Operating Expenses are expenses that reduce the rate of return of the investment option. Table 3 also shows Shareholder-type Fees. These fees are in addition to Annual Operating Expenses. To find additional information about your investments, please see applicable fund information in the appropriate documents made available to you (e.g. prospectus, Fund Fact Sheet, fund information section on the plan's web site, etc.).

Voya "Excessive Trading" Policy

Voya actively monitors fund transfer and reallocation activity within its variable insurance and retirement products to identify Excessive Trading. Voya currently defines Excessive Trading as: a) More than one purchase and sale of the same fund (including money market funds) within a 60 calendar day period (hereinafter, a purchase and sale of the same fund is referred to as a "roundtrip"). This means two or more round-trips involving the same fund within a 60 calendar day period would meet Voya's definition of Excessive Trading; or b) Six round-trips within a twelve month period.

Each fund available through Voya's variable insurance and retirement products, either by prospectus or stated policy, has adopted or may adopt its own excessive/frequent trading policy. Voya reserves the right, without prior notice, to implement restrictions and/or block future purchases of a fund by an individual who the fund has identified as violating its excessive/frequent trading policy. All such restrictions and/or blocking of future fund purchases will be done in accordance with the directions Voya receives from the fund.

Voya's Excessive Trading Policy does not apply to Employer Stock Funds, Fixed Account, Fixed Plus Account, Guaranteed Accumulation Account or Stabilizer.

The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings. Visit the Department of Labor's Web site for help with understanding your retirement plan fees and expenses at <https://www.dol.gov/agencies/ebsa/about-ebsa/our-activities/resource-center/publications/understanding-your-retirement-plan-fees>. Fees and expenses are only one of many factors to consider when you decide to invest in an option. You may also want to think about whether an investment in a particular option, along with your other investments, will help you achieve your financial goals.
